

Solution Architecture

Date	29 September 2026
Team ID	SWTID-2026-1393
Project Name	EduGenie – AI Learning Assistant
Maximum Marks	5 Marks

Solution Architecture Diagram

High-level architecture for EduGenie, showing the presentation layer, application services, external AI integration and data/storage layer.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the student-facing interface for entering topics/questions and viewing explanations, summaries, quizzes and learning assistance.	HTML5, CSS3, JavaScript
API Gateway	Receives client requests and routes them to the appropriate backend functionality through API endpoints.	FastAPI, REST API
Core Logic Service	Processes learning requests and coordinates explanation, learning-path, Q&A, quiz and summary features.	Python modules, FastAPI
External API Integration	Connects EduGenie to the generative-AI service for AI-generated learning content.	Google Gemini API / Gemini model
Database / Storage	Handles application/request data and project resources. The current project does not specify a dedicated relational or NoSQL database.	Application data / project files
