

Coding & Solution

Date	29 September 2026
Team ID	SWTID-2026-1393
Project Name	EduGenie – AI Learning Assistant
Maximum Marks	5 Marks

Coding & Solution

EduGenie is implemented as an AI-powered learning assistant that provides students with learning support through a web interface and generative-AI based backend processing.

Instructions / Implementation Summary

The solution is organized into frontend resources and Python backend modules. The application uses FastAPI for backend/API handling and Google Gemini for generative-AI learning assistance. The project source is maintained in GitHub.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/madhumidha050-alt/EduGenie-AI
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	FastAPI
Key Features Implemented	AI-generated explanations; learning-path support; question answering; quiz generation; summary/study-note generation; web-based learning interface.
Pending / Incomplete Features	No specific pending feature is identified in the supplied template/source. Further enhancements can be added based on project requirements.
Setup / Run Instructions	1. Clone/download the GitHub repository. 2. Create and activate a Python virtual environment. 3. Install dependencies from requirements.txt. 4. Configure the required Gemini API key/environment settings. 5. Start the FastAPI application and open the provided local web URL in a browser.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

EduGenie follows a modular Python-based backend structure with separate learning-support modules. The project uses FastAPI for API/application handling and Google Gemini for generative-AI functionality. The source is maintained in GitHub, supporting version control and project sharing. The repository and setup should be kept updated as new features are added.
